Cast iron inserts are a kind of fireplace insert.

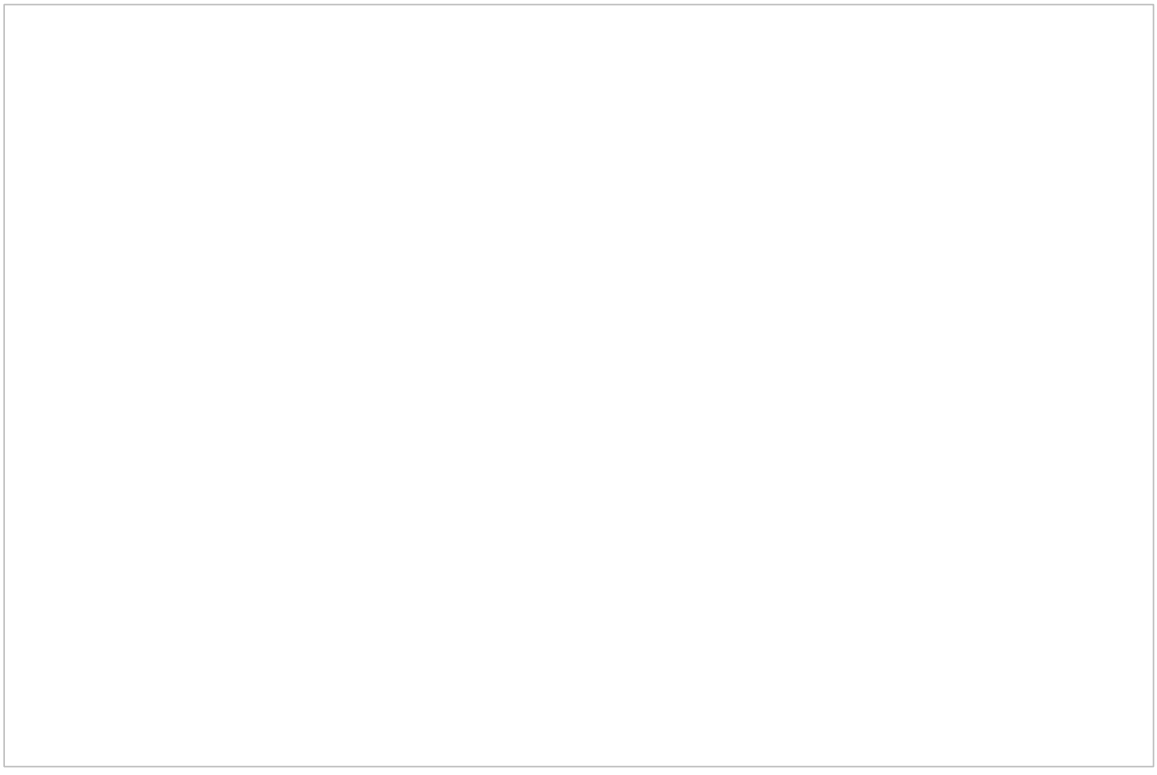

Most of the time, antique fireplaces' cast iron inserts are cast in one single part.

1. **Antique cast iron inserts**

   Very beautiful antique fireplaces are sometimes provided with their **original cast iron insert**. If so they are often decorated with elegant foliages, volutes and open flowers.

   Originals cast iron inserts perfectly copy the shape of the fireplace, as the following photos show :

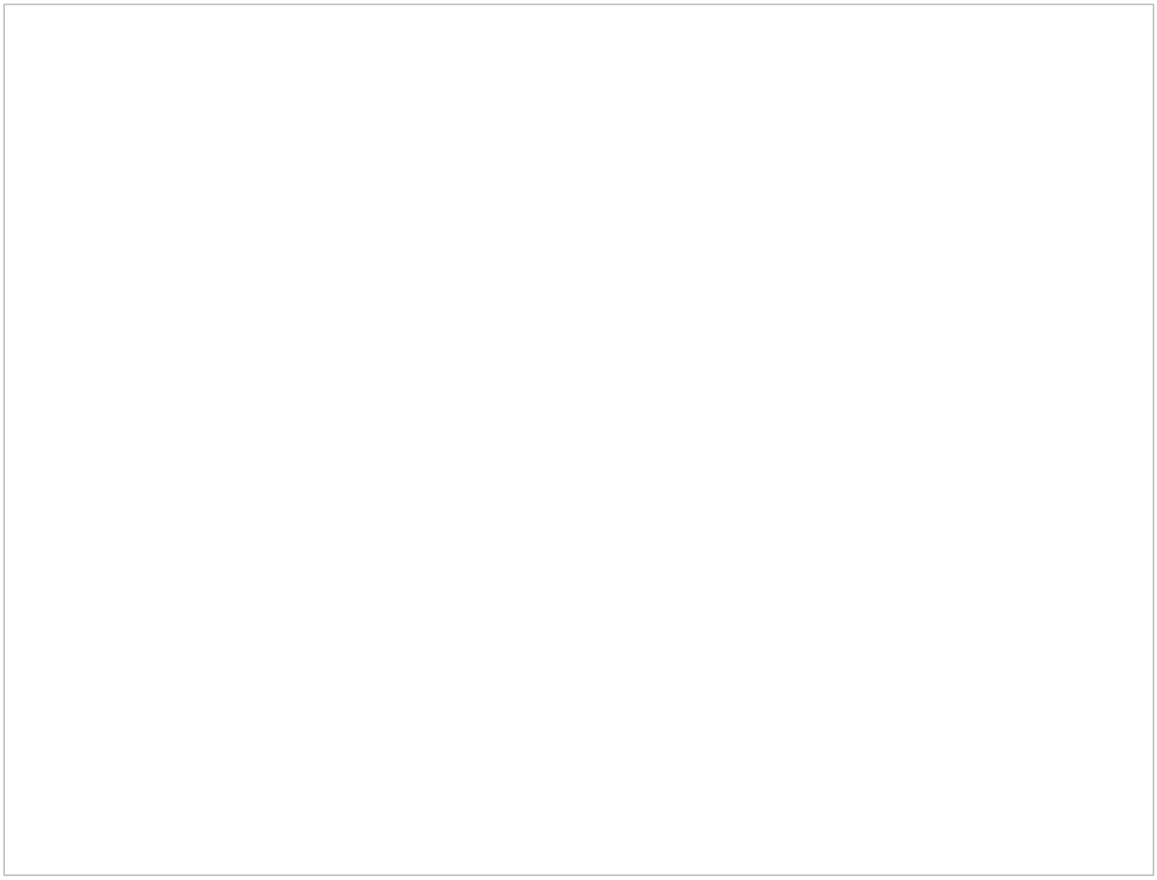

Some antique cast iron inserts are also provided with a complete hearth made out of cast iron plates :

2. **Antique copper inserts**

   On some rare fireplaces, the insert is also made out of copper, and is often very elaborately decorated.

3. **Modern cast iron inserts**

   Sometimes, we can also make modern cast iron inserts, which are new editions of antique models. In this case, the cast iron insert is perfectly adapted to fit the fireplace.
